

Testimonials Booklet

*Transcript of Jan 9, 08 Conference Call
Hosted by Delores Mishleau & Deanna Sudweeks*

Conference Call

Good evening everyone. This is Delores Mishleau. Tonight we are going to focus on *E-Power* Testimonials. The pre-launch of this product occurred in Mexico City in the month of August, and one of those fortunate Distributors was a Manager from Canada, **Joni Bradley**. *Joni Bradley was at the Convention and was one of the first people to walk home with an E-Power.*

Delores: Joni, were you excited when you got that *E-Power*?

Joni: Oh yes! I thought like Wow! This is something that I can really hang on to.

Delores: So you took that *E-Power* home and got right to work with it.

Joni: Yes, since I got it I've used it 3 hours every single day. I got it on the 17th of September, and I can see lots of different things that have happened over that amount of time with changes in my body that are really positive. I have lost 6 inches in my hips, 5 inches in my bust line, and 2 ½ inches in my waist. I've got a more defined jaw line, which is wonderful, and a lot of the wrinkles on my face around my eyes, even though they're smile lines, they have disappeared as well.

Delores: So that is amazing! I mean truly amazing - 6 inches on her hips! It was also interesting in line with those numbers you just gave us about how many inches you had lost and trimmed up. You haven't had a lot of weight lost, have you?

Joni: No, I've lost about 8 pounds, and it seems to just have stayed at that. I understand that muscle weights more than fat, so perhaps I got more muscle.

Delores: Well as long as we look good in the mirror, right? That's what really counts. That is awesome. There are many women on the call tonight and even some guys might be thinking Wow! If I can lose some inches here and two inches here and five inches there, that's what I'm looking for. So help us understand Joni, how did you fit this into your daily routine?

Joni: When I first got it, I would do it first thing in the morning. I woke up at 5:00 in the morning, so I turned on the machine and used it for about 90 minutes until it was time to get up. Before I went to bed I would turn it on and do another 90 minutes. At that point in time I wasn't using the continuous button. However, in the last two weeks or so, I have started using the continuous button and just going to bed with it. It wakes me up after about 2½ or 3 hours, and then I take it off and turn it off.

Delores: What would you say to people thinking about buying an *E-Power*?

Joni: I think it's the very best machine that HTE has come out with yet, and I think it will be one of the things that will sell better than anything else. I have an insurance business, and my clients look at me and say, "What on earth have you been doing?" I think it's because I'm over 50 and I'm looking younger and younger all the time, which is very exciting. Once we hit 50, we figure it's all downhill from there.

Delores: It is certainly a fascinating device, and we are going to learn more about what it's doing for us internally. With the experience you had, I can tell you are going to keep using that *E-Power* for a long time.

Joni: Absolutely!

Delores: Joni, thank you so much for sharing with us tonight, and you also have some very excited friends who are on a waiting list if I remember correctly?

Joni: Yes, I actually have 30 people that are very anxiously waiting for the machine to be available in Canada. So I have been torturing Richard to see when it will come out.

Delores: The word is “soon.” So keep that list handy. I know they will be happy and you will be excited as well so that will give you a great push on your journey to be President. Thank you so much Joni.

We have other guests who are joining us tonight from Arizona. *Martha and Denis who are normally part of our Willmar, Minnesota team, are enjoying some warmer conditions in Arizona. Just to give us a little bit of background, Martha and Denis are Supervisors of HTE and they've had the Chi Machine, HotHouse and ERE for about a year now; is that correct Martha?*

Martha: We got the other machines on April 1st last year.

Delores: And I know that you love those machines and you use them faithfully, but when the *E-power* came out you were in for some new surprises. Share those with us please.

Martha: Well, I've had a constipation problem since I was a young girl. We got the *E-Power* January 2nd. I've used it for an hour every day. Now, I had taken Metamucil for the last 32 years, but I no longer have to use it. I don't use stool softeners and I am going regularly every day. This is the most wonderful thing I've ever come across.

We didn't bring our other machines with us but left them with our friend that has cancer. She is feeling much better. I also have a friend

here in Arizona that I am letting use the *E-Power* and she uses it for 30 minutes per day. She, too, had a constipation problem, going once every 3 days. But now she goes regularly every day. My husband, Denis, uses it and he goes regularly every day. So it is the most wonderful piece of equipment that we've ever had.

Delores: So it's getting everyone moving?

Martha: Absolutely. I'm so glad that we ordered this when it was available to us.

Delores: Thank you for sharing, and that is a very special testimonial

Martha: Yes, it awesome. I had a colonoscopy and the doctor told me to take stool softeners all during the day and that would help, but this has been the most wonderful thing I've ever come across.

Delores: And next, we'd like to go to Deanna Sudweeks. I'm so privileged and excited to have *Deanna Sudweeks joining us tonight. She is a Distributor, a President - a Jade President nonetheless, and all of us have great gratitude for the way she pioneered with HTE here in the USA and Canada. E-Power has been a very exciting addition to our business. I know Deanna, that you are very excited about it.*

Deanna: Thank you; I'm glad to be here. Like Martha and Joni the *E-Power* is the most moving experience, and I mean that in every step of life, it moves everything. I'm going to start with the testimonials first, and then I will do a summary. Go ahead *Dr. Novak from California, tell us about your exciting experience.*

Novak: We came to visit our new great-grandchild in Utah, and Deanna said, “You've got to come and see what I have!” Well, I

have everything there is to have anyways, you know, being in business for 42 years. My husband is a Chiropractor and I'm a Therapist. We worked with the 49'ers football team for 9 years, so we are very seasoned. I thought I don't need another piece of equipment, but Deanna said, "I can stay up and show it to you because I don't know how else we can work it in."

It was 10:30 p.m. when Deanna put my husband on the *E-Power*. He was about 50 when he worked with a weed eater and hurt his arm. He was scheduled to have an operation on his torn rotator cuff. Well, #1) he didn't want to have an operation, and #2) it doesn't always work when you get the rotator cuff repaired. He never had the operation, and he is 72 years old now.

When Deanna tested him, it showed. She said, "Ted, you're having trouble with your right shoulder." He said, "How do you know?" The florescent light tester on the *E-Power* dimmed when she tested him. So she let us take it home. That night we left it on for half hour. When you first get started, you don't leave it on a long time. After 4 days we called Deanna and said, "We can't believe this!"

You know, Ted's shoulder was so bad that he had great difficulty pulling up his pants. He couldn't even put his belt in his pants, so I had to help him with it. To make a long story short; Ted didn't get his arm operated on, and now he can pull up his pants on his own!

And, it turns out that the *E-Power* helped in other ways including "cleaning" cells and blood. We tested the pH of our urine and the pH improved within a week! *E-Power* gets rid of all the toxins. We are excited about what *E-Power* has done for Ted. I hardly ever get the chance to use it because Ted is sleeping with it every night!

Deanna: It will be great when we get the ports so we can have 2 belts that we can use at one time - then you will be set!

Novak: I know. We recommend it to everybody and, specially, if there are any doctors listening, it's a great tool for your office because you can tell right away where people are hurting when the light shines and then gets dimmer and dimmer. It's so exciting! When you're using *E-Power*, the energy goes through your entire body, treating your whole body.

If we take a little fluorescent light bulb that isn't plugged in, and put your hand on the light bulb, it lights up the light bulb! It's a shocking revelation when you see yourself lighting up a light bulb! And then, we take that light bulb and go over the whole body. If there are problem areas the bulb dims gray, and that's how we know where to treat the patient.

It's so exciting to have a tool that you can treat the whole family with and that is so reasonable in cost. I don't know if I sound excited or not, but I'm so excited! We are so excited because now we have every tool there is - we really do have everything! We have been in the business for 42 years; married 54 years. If anyone has any questions they would like to ask Dr. Ted, he is not busy right now. He wasn't able to use his arms, he wasn't even able to massage until after *E-Power* - but he can massage again now!

Deanna: Thanks for your sharing. **Gene Mervin**, are you on the line?

Gene: Yes I am.

Deanna: Tell us your story.

Gene: I'm glad to. Deanna said, "You've got to come down and see this new machine I have." I said, "Okay, fine." So I went and she said, "Okay, we are going to strap you up."

She put the *E-Power* belt on me and ran her little fluorescent light bulb tube over my body. She said, “Man you’re not lightning this thing up at all, it’s pretty dull!”

I was suffering from cancer at the time. I had lymphoma in the subcutaneous T cells in my arm. The bulb was pretty dull - not just in that arm - it was dull everywhere. Deanna said, “Whoa! I just can’t believe that you can’t light this thing up. It seems blocked or something.” Deanna reached down and touched the bulb. It glowed! Amazing!

Well I ended up purchasing a unit. Deanna let me borrow hers for a while so I could sleep with it. After a few days, it must have loosened up everything in my body because, all of a sudden, things started flowing. Above my bed I have a couple of lights. There’s a touch bar underneath the end of the headboard where if you touch it, the lights turn on dim. If you touch it again it gets brighter, and so on until you finally turn it off. The energy is flowing so well through me now that I can’t even put my hand near that touch bar because the dimmer starts and shuts off so fast! My wife said, “Get away from that thing! I can’t sleep!” because it really has loosened things up.

Deanna: And that’s without touching it?

Gene: I don’t touch it at all. I’m at least a good foot away from the touch bar. In fact, the grandkids didn’t know about the touch bar and they said, “Grandpa you’re magic!” Then I played with them a bit and said, “I’ll show you,” So, I’m a foot away from this touch bar and I just kind of flipped my fingers at it while I’m hooked up to the *E-Power*. The lights come on the *E-Power* and I just keep playing with the kids, flipping my fingers, when all of a sudden the energy just jumps over to the touch bar and turns on the light! They start to squeal with delight because they think I’m

magic! The truth is, I think *E-Power* is magic! I feel so much better!

I used the *E-Power* a lot before I went in for an MRI. Of course I didn’t know if it would help. All I knew was that I was really concerned about whether they would find cancer in any another place other than my arm. So I used my *E-Power*, ERE, HotHouse, and Chi Machine as much as I possibly could. When they finally did the MRI they said, “You don’t have cancer anywhere other than on that arm.” So, I don’t know. Did the *E-Power* help? The *E-Power* is meant to do one of two things: keep you healthy or give you a chance to get your health back. That’s why I’m using it. And I’d like to personally thank you Deanna, for introducing it to me.

Deanna: Thank you. I appreciate that. I think the whole family was concerned. Gene’s my cousin and we were just thrilled to get the report back that the cancer had not metastasized anywhere. Thank you Gene. Now, is *Alan Simmons* on?

Alan: Yes I am. Thank you Deanna. One of the benefits that I was first made aware of is in the area of mental clarity. I have a job where I work long hours. Sometimes you’re there physically, but you can’t concentrate so you don’t get much accomplished. It’s like the more hours you work the less you accomplish, but you just keep trying to finish it.

On November 6th I started a new job and started using the *E-Power* machine on a daily basis. One of the things that amazed me was finding myself in the office at 9, 10, 11 p.m., sometimes through 1 or 2 in the morning, and still be able to concentrate and focus. In addition, I had a problem with becoming drowsy on the long freeway drives home - especially after working so late. This new job I started was a 100 mile round trip – 50 miles each

way! On these long drives, my vision would become blurry and I was in danger of falling asleep at the wheel!

One night, I found myself behind the wheel of my car and felt like I was looking at a 68-inch plasma TV! I realized that my vision and the way I saw the road that night was something I had never experienced before. A couple of times I thought, "This is sort of strange." So, I quit using the *E-Power* for a couple of days. I was barely awake late at night. I started to use the *E-Power* again and feel a mental clarity that was just really fantastic. I'm 56 and I'm trying to compete with younger people. I'm able to get a lot accomplished on the job and I think *E-power* has terrific benefits for me!

Deanna: Thank you. I think he says, "I'm powered by *E-Power*," and that's a moving experience. Is *Marilyn Smith* here?

Marilyn: I'll give you some background first. I've had several accidents and two back surgeries that left me with pinched nerves in my lower back. This has been going on for the last 10 years. Sitting really aggravated the nerves, so I couldn't sit for any length of time. I simply wasn't able to walk, sit, or stand much at any one time. In the last year I've been doing some therapy (and it helped somewhat) but I still couldn't sit without pain. In addition, I suffered from bipolar depressive mood swings and most of the time I was polarized in depression.

I went to one of HTE's meetings and layed down under the HotHouse in the corner of the room. If I did move, it was mostly to kneel down or stand up with the help of a cane.

When I came to the meeting I was clinically depressed. I did what I could to pull myself up, but I had been depressed for several days. It was at this meeting that I was introduced to

and had my first experience with *E-Power*.

I wanted to try the *E-Power* but asked if I could be the very last person to try it. If I had to sit down to do this, I wanted to be able to go home immediately afterwards to curl up under my Hot House and get rid of the pain because that has been always my experience with sitting. So, I took the risk and got hooked up to *E-Power*.

As soon as I sat down, I could feel the electric stimulus going all over my body, and tingling in my head. I felt like all of my pathways were being cleared - instantly balanced and with a clear mind. And, the pain was gone! I was able to sit! You're supposed to start slowly on the *E-Power*, but I wanted see what it could do. I put it on full power and was able to sit for 90 minutes straight!

After such a dramatic experience Deanna let me come over to her office and use the *E-Power* until I was able to get my own. I acquired more energy sitting and being on the *E-power* than I ever had. For me it's like you take your cell phone and plug it in, and well now, you plug your body in and it reenergize with the *E-Power*!

Deanna: I want to say something about Marilyn. People knew her and had seen she couldn't sit, stand or lie down for long periods of time. At our meetings over the past 10 years, she had to lie on the floor.

Now when they see her, they can see that her face is brighter, she is more alert, and very affable. I know a few people saw her and they said, "Oh my goodness, I'll order one." So we sold a few just by her walking in the room. Then at the next meeting more people noticed saying, "Oh my goodness! Look at her!" The biggest thing is that it has given her more independence in that she can go to a place and

sit down instead of have to figure out another way. Marilyn?

Marilyn: Oh yes! I originally had a little scooter rather than a wheelchair because I couldn't sit down. I would kneel on the scooter with piles and piles of pads. I'd bring my whole bed with me when I went to the meetings.

Deanna: And she had her scooter all stuffed and then she could lie down. And now she walks and sits on a chair!

Marilyn: And I had to be under the HotHouse the whole time. Now I'm sitting! I'm giving up my scooter and my crutches. I can sit now.

Deanna: The whole thing here is just absolutely exciting. She is our greatest declaration of just what *E-Power* will do. Now, let me just quickly tell my story, and then I will go to Julie Herbert.

I'm diabetic. My kidneys need the jumpstart that *E-Power* can provide. Everyone that I talk to, once they get on *E-Power*, even if it is just 15 minutes, notice that their kidneys start working and moving. You'll notice the strong smell of your urine at first. *E-Power* begins a cleansing process. After a while, you'll notice that your urine doesn't smell and it's gone clear instead of cloudy.

My father and myself both cleared up our digestion problems. The bowel began regulating itself. You might not say you could clock on it, but you'll know that you can plan on it at least once or more per day.

And sleep feels so refreshing! I put *E-Power* on and I sleep with it anywhere from 3-6 hours every night. If you get to bed late, like 3 or 4 in the morning, you wake up and you go "Gosh I feel refreshed." Now I'm not say-

ing that you don't need to sleep; you still need to sleep. But if you have a deadline that you have to meet and need to stay awake to get it done, go on the *E-Power*. It is unbelievable how clear your mind feels.

I had wanted to write a Christmas letter and was having trouble, being able to write only a few notes. Now, I've written a number of best sellers - cookbooks and things - so I had some sort of writer's block, but after I used the *E-Power* I said, "I want to write my Christmas letter." I jotted a few things down and then got back on the *E-Power*. I waited a day and within an hour and a half of sitting down I got my 2-page Christmas letter all done. It had to be tweaked a little bit with the spelling and grammar, but it was done. I thought, "I've got my blessing back!" I had the ability to explain things, making the letter clear. My personality flowed out and I felt like I had a whole year in review that I could share with others. I could not have done that without the *E-Power*. That was just the greatest blessing I had.

The other thing I know is, if I get on the Chi Machine and the HotHouse and then get on the *E-Power* before I go to bed, *E-Power* helps to pick up my blood sugar. I believe that for insulin resistant type 2 people *E-Power* can help decrease the amount of insulin they need. It picks up and uses the insulin they way your body is supposed to handle it. I can't say how much of a difference it will make but, I think it will make about a 10-15% difference in most people. It may not do it all at once, but I know that I decrease my insulin when I use *E-Power* at night because it does pick up insulin that's in my tissues. Also, I had quite a problem with swelling on my knee. *E-Power* really decreased the swelling.

When sleeping with the *E-Power*, try not to touch your spouse's skin directly or you'll

get a shock. If you're sleeping with pajamas on, you can just cuddle up and they'll get the same stimulation waves you do. You can help two for the value of one *E-Power*! I do it every night and we cuddle just fine – although we try not to touch each other's hands! If you do accidentally touch, don't worry, it's not anything real dramatic. It's like a carpet shock.

The longest I've used *E-Power* at one sitting was when I went to Asia. When I came back I was extremely sick and used *E-Power* for 47 hours straight. I know that this activates the ATP, but when you have a lot of acids like I had with this bug I brought back with me, it's not going to heal you but it can help keep your body's immune system working.

Now, you don't want to use *E-Power* if you have on any electrical devices. This includes pace makers or any type of electric monitors. My doctors had to use an electrical monitor to check my blood sugar just under the tissues and it totally shut the monitor off. So don't use anything electrical on your body while using *E-Power*.

I know I sold 17 last month but we will talk about that later. I'll go ahead. I have a special guest. ***Julie is my little crown princess on the E-Power and I'm going to turn the time over to her and I'll finish up at the end.***

Julie: Thanks Deanna. I'm so excited about this machine I just feel we've got our hands on something so extra special. Before I go into some of the testimonies that I personally heard from some of my people, I'd like to talk to you about ATP. It is critical for people to understand because ATP gives your cells energy. The *E-Power* is making your cells more permeable. It's activating the ATP to clean up your cells and reduce inflammation. That's why so many people are having such good results. Everybody can use more energy, have

cleaner cells, and get out the inflammation and the mucus, and you could reduce your chances of getting numerous diseases.

Well cells in the pH is really exciting because of course, stress and toxic relations, toxic emotions and food, can all affect our pH. If you don't have a good alkaline balance in your body, mucus and high acids create inflammation that causes disease. *E-Power* is doing a lot of things simultaneously, like massaging the cells 70,000 times per second making your cells more permeable. And the sodium potassium ratio is very important for you to know because if you have a poor sodium potassium ratio then basically your cell membrane becomes stiff. It's inflexible, toxic. Think of it as "terrorism at the cellular level" so to speak. We've got cells that are not functioning and like Deanna said, diet can create this insulin resistance and diabetic habits are a real challenge for the cells that aren't responding to the insulin. Then, the pancreas makes more insulin and causes inflammation of the cell membrane.

So here we have a great thing where it's making our cells more permeable, where toxins can get out, nutrition can get in, we can start to assimilate in our nutrients better and its helping our cells to communicate. Instead of being inflexible and stiff, *E-Power's* helping the mitochondria cells and it's giving us electrical energy that we so need. It's so exciting I think it is a great unit that everybody should have.

Many of you probably have read or heard of the book "The Body Electric." Without the currents inside our bodies, we would die. It's very exciting to know that we can put on *E-Power* and charge up our little battery pack getting a lot of electrical abnormalities to come into balance. We can get that electrical

connection going within the body.

I think the biggest thing for me is that I love to study and I love to learn and I just love to soak things up. I can retain what I'm studying and I can study for long, long periods of time. I also benefit from better circulation and more energy! I sleep sounder; it seems like I just have a sense of less stress and I don't seem to run on so much adrenaline. Maybe it's balancing out my adrenals as well as my hormones!

I feel such a solid energy that I'm like Deanna. I can stay up late and I can get up early and I know I still need sleep but I really can do really well even when I'm not getting adequate amounts of sleep. I can just juice up and keep going - this really is a blessing. I thank Deanna and all her hard work and effort and thank you for the opportunity and thank you for letting me talk.

Deanna: Can you tell about the one lady that was in our meeting who had migraines constantly? She was one of your people and she used the *E-Power* for just one night and didn't have the migraine the next day. She used it the day of the meeting - she came with a migraine and got on it, do you remember that?

Julie: Yea! She had a migraine and then another gal had, well I have people with MS that have used it that are walking with better balance and they have better energy. They are not crashing. A lot of the people aren't getting sick, which is really exciting. People have lifted out of their depression and their headaches are gone.

Deanna: And it does something to the brain-power, isn't that right?

Julie: Yes, it's huge what it's doing. Our brains need electricity. You know we've got a lot of toxins floating around in our bodies that are kind of "jamming the parking space" (so to

speak) resulting in all these receptor sites that are not getting the nutrients they need. I think of it like cars parked and they are just in the way. And you clear that out and then you give the cells what they need and you're able to get the nutrients, hormones, oxygen and all these good things into the cells. Take the wastes out and then everything starts functioning better. But the brain... you know the different tests they do including an EKG for your heart, is really checking your electrical current. That's because this current is what keeps our body's going.

Deanna: It also works with the main systems in our body. We are not just working with one thing or just oxygen or just infrared or some of these others; it works with every system in our body.

Julie: It's working with the metabolism, the immune system, skeletal system, the skin, the bowel, the urinary tract. I mean it just goes on and on, even if *E-Power* affected just one or two systems that will be awesome but it's doing all of them simultaneously!

Deanna: And all the older people that have broken hips, they can go ahead and help rebuild the bone in the body with the electrical stimulation that *E-Power* provides. We just need to use it as many times as we can. Now, I'm not saying that everybody needs to start sleeping with it but when I heard that HTE's Chairman, Mr. Gordon Pan sleeps with it, I say I really need to try it.

I would recommend you take it and put it in a plastic pages binder. Then, when people come over have them sit in a chair with their feet on the ground, hook them up to the *E-Power* and ask them if they'd like to see the binder. Tell them that when they read this to ask any questions. I have the whole PowerPoint presentation in a notebook - all color pages and

people will go ahead and read it. You can't tell somebody - it will take you hours to explain what *E-Power* can do. But this way they just take off their jewelry and flip through it. I tell them that it's as simple as 1-2-3-4-5:

- 1.Plug it in.
- 2.Turn it on.
- 3.Use the continuous button or the timing button with 30-60-90 minutes.
- 4.Determine if you want low, medium, or high frequency.
- 5.Go ahead and hit start.

Now, its just 5 things, that's easy to do. If you can remember those 5 things, you can do it. If somebody is very big and they can't fit the belt around their middle, put it around their leg. It works really well around a big person's leg. If they have a belt with metal, you may want to take that off. They don't have to take their shoes off. If they have some jewelry that they can't take off like wedding ring that's been on for many years it still works just fine with no danger to you. Just remember, it won't hurt you if you have on these things its just that *E-Power* doesn't work as effectively if you have certain things you just can't take off.

So that's what I like about the negative potential. It's for the whole family. You can put a dog on your lap while you have it around you and they get vitalized. You can put a baby on your lap and it vitalizes him - just remember not to touch their skin! Use their clothes as a coat and just hold them. It works so well with everything but do not use it with metal or electrical equipment and it is wonderful!

And what I've done with the *E-Power* guide is to copy it and give it to people that buy the *E-Power* from me. I give a copy of the PowerPoint and the *E-Power* Guide in each one of my *E-Power* machines. This way I haven't had

a single person come and check the *E-Power* guide & Power Point. If you try to tell them it will sound too good to be true.

With 7 years experience HTE's got a terrific track record - without any bad side effects. Your friends, clients, upline, downline, relatives, can try it for 2 weeks. If doesn't perform the way they like they always have the wonderful HTE warranty. So like I said, this is a way to go ahead. We still need the Chi Machine for oxygenating the body, blood and massaging the organs. We still need the Hot-House to release far infrared rays that activate the macrophages that clean all the damaged and diseased tissues. The ERE will help to put wave frequency in bacterial and cancer cells so they don't replicate. We also have the ERE pads to work specific muscle groups. So anybody with the flu or anything like that needs the ERE. And now we've got the *E-Power*. It's really great when you can be energized by *E-Power*. Using all of the equipment together will help balance your body's systems. You know that our equipment doesn't claim to provide any cures, but your body can better handle the things that have been thrown at it if you use this equipment regularly.

Barbara: I've been using the *E-Power* for 2 weeks now and just 30 to 60 minutes a day and for the very first day I found that it clears up the skin it normalizes heart palpitations. I've been having problems with that and both my husband and I noticed that our health has improved. I don't know if it's my imagination but this is better and I feel better too. So I have high hopes for *E-Power*. Thank you.

Marian: A couple of the things that I really appreciate about *E-Power* is the ease of use and that it's simple to share with people.

Deanna: The biggest thing is that people are nervous because it's an electrical device.

They don't know what "**Electrical Potential**" is. And what negative potential means, from my understanding, is "ions." We all have them and the negative ions will not hurt you. It's the only thing that is good for you - this negative potential. Positive ions are not good for you. So when you see negative don't be scared. Think, "That's exactly what I want!" I want all the negative ions I can get. And so that's the only negative we want. We want to go ahead and realized that this is healthy for all ages. It is very simple.

Some people have the small little fluorescent light bulbs. I have one that is 2 feet long and covers the whole body. I went over one lady and her neck was really, really bright. As I went over the top of her head it didn't light but the neck was really bright. I asked, "What's wrong with your head?" Then I go down her shoulders and got a little light to show up. Sometimes when it's really bright it means all the energy has gathered in one spot and it doesn't go to another place. It's good to have it light, but if the light bulb is half dim or won't light up ask them to hold the other end. If you're holding one end and they hold the other end they will see it will light up. But some people are so sick, like my cousin, it took 3 days before he got well enough, that when he held it and I held it it would light up.

Another little trick I like to do is to take the fluorescent bulb, touch their hand and roll the bulb over it. When you do this it gives enough light but the thing you're going to see is people that have aura readers and the negative potential. What's going to increase is their aura. As you get better and better your aura expands and expands and that's why your endorphins are being released. You'll have such a feeling of wellbeing once you use it.

E-Power is just tremendous and everybody

needs a little battery charger. And this charges the battery so the ATP that carries the chemicals and energy within each cell for your metabolism gets activated. That's what we want. We want all of the 8 systems of the body working in balance. I don't know a better machine. I bought one that was supposed to be good and it was good. It was the best they had five years ago and it was \$3,000! Here we have it this month for \$649 and also we have the package of 5 with a free Chi Machine. Just have them in stock. I got a case and put them in a case. The cases are available through Jeff Kowalski.

Delores: I just want to clarify one point for people who haven't seen the *E-Power* in action. Think of going through security in the airport and they pull you aside to be checked. That's basically what Deanna's describing as you take the fluorescent bulb and go near the person who is on the *E-Power*.

Thank you Deanna for being with us tonight, it's been a pleasure. My name is Delores Mishleau and this been my privilege to be your hostess for this HTE international conference call.

E-POWER TESTIMONIALS

Silvia Vidal Morales

Monterrey, NL

I am 40 years old. My doctor recently gave me an exam and detected severe digestive problems including chronic constipation and gas. My abdomen looked big and my breathing was difficult. I also had pain in my stomach about an hour after eating. I had this problem for nearly 2 years.

I started to use *E-Power* for half an hour every day. On the fourth day, I expelled a part of a parasite (tapeworm)! The expelled part of this parasite was almost 90 cm. long!

My mood started to change and I started to feel better. The next day, after treatment with the *E-Power* machine, I didn't feel any abdominal pain. Since beginning *E-Power* sessions, not only have I expelled the parasite, but my overall health has improved dramatically.

Oscar España Fuentes

Monterrey, NL

I am 75 years old with no family background related to my current condition. About 6 months ago, I started to feel very tired. The color of my skin turned light yellow, and problems such as bad breath, insomnia, nightmares, and aggressiveness were increasing every day.

I went in for a check-up. The doctors examined me, running numerous tests. One possibility they told me about was cancer of the liver. After all the tests were in, they concluded that I had a "Crisis of Hypoglycemia" (low blood sugar).

I started using *E-Power* one hour per day, along with the complementary treatment. After using the machine, I started to notice an increase in energy, and the symptoms of hypoglycemia that used to haunt me daily started to diminish. After a month of *E-Power* sessions, I went back to my doctor. I did not show any signs of hypoglycemia and the test results came back in the normal range.

I'm currently on the same program and monitoring my health closely. At this time my hypoglycemia has disappeared and my overall health is stable.

Oscar Ortiz

Monterrey, N.L.

At the beginning of this year, I got sick with the flu and a throat infection. I used the *E-Power* for 1 hour in the low mode and 4 hours at medium intensity. By the time I woke up my symptoms had disappeared!

I used the same treatment with my son since he was having the same discomfort I had, and he obtained the same result. It eliminated the symptoms of the flu and throat infection in a very short time for both of us!

Susana Garcia Rojas
Guadalajara, Jal.

I am 60 years old. Twelve (12) years ago I started to have headaches, tiredness, drowsiness, and shakes. For that reason it was necessary to see my doctor, and I was diagnosed with diabetes. This was a big shock because diabetes is one of those diseases that if you don't take good care of yourself, it can provoke death.

I started taking medication and stayed on it for 3 years but my blood sugar leveled out at 280. I visited other doctors, but it was always the same. It didn't matter what diet I was on, my blood sugar remained too high. Other doctors prescribed Insulin. I was treated with the Insulin plus another medication, and was able to achieve a blood sugar level of 140.

Headaches were part of my daily life, and besides that, I started to have pain in my neck. My doctors said it might be a wearing of the bones and they recommended exercise. So, I went to a massage therapist and started to exercise. My headaches started to diminish for about half a year.

One day my doctors recommended that I visit a Sports Clinic with specialized personnel. Dr. Pablo Betancourt, Director of the Cell Rehabilitation Department in Angeles del Carmen Hospital in Guadalajara was the one who recommended the *E-Power* machine. He put me on the machine for 30 minutes per day Monday through Friday. After a week of sessions, I started to feel bad, developed a terrible headache, and drowsiness. After testing my blood sugar, I was amazed how much it dropped - only 78! This situation never happened to me in the 12 years I had been suffering with this disease. I called Dr. Betancourt and he told me that the discomfort I had that day was due to the detoxification of my body. He asked me to stop taking insulin and only take the other medication, and to keep monitoring my blood sugar levels everyday.

Truly, *E-Power* is marvelous! Since that day my blood sugar levels have been between 110 and 120. I now have more energy, which makes my daily labors easy, I have a better quality of life, and most importantly, more will to live!

For this reason, I address my testimonial to those people in the same condition as I was in. I suffered many long years with this terrible disease. I'm currently taking medication, but Dr. Betancourt encourages me to use the *E-Power* everyday. Therefore, if God wants, in a little time, I could stop taking the medication. I thank God for leading me to *E-Power* which in a very short time lowered my blood sugar, eliminating the discomforts and headaches.

Francisco Benavides Garza

Monterrey, NL

I am 68 years old and for a long time I suffered from pains in my whole body: arms, waist, neck, legs, and (especially) my right knee, which was very swollen and red. I also had numbness in the plant of my foot. I took a lot of pills for the pain, and I didn't want to keep taking them. I noticed that I was retaining fluids and it appeared that I had gained weight as well.

I began to check out alternatives with faith in finding relief. And, soon after being introduced to and trying HTE's amazing equipment, my life changed! Since October 15, 2007 I've used their equipment every day - the ERE for 15 minutes, the Chi Machine for 5 minutes, the *E-Power* for 15 minutes and the HotHouse for 30 minutes.

After the third session, I started to urinate more. I calculated that for the fourth session I urinated an average of 15 liters! My water retention and my bulging stomach have been greatly reduced thanks to HTE's life changing equipment!

Fernando Estrada

Monterrey, N.L.

During the last 3 years I suffered with astigmatism, preventing me from reading up close. I only saw specks.

Approximately 3 months ago somebody recommended HTE products. I started to use the *E-Power* for 30 minutes every day, and it helped me a lot. I can now distinguish letters. I'm tremendously satisfied with what this product has done for my health.

I'm also very happy because for years I tried other alternatives and I was resigned to use glasses my whole life; but now, with the continuous use of this equipment, I stopped wearing glasses.

Jose Luis Cortez

Saltillo, Coah.

I had been suffering with diabetes for a while. Not long ago, I met Dr. Rogelio Vargas and talked to him about HTE's equipment, including the *E-Power*. He was skeptical and, on my insistence, he challenged me! He suggested we do a blood test and if the results were favorable, he would buy an *E-Power* from me.

After doing the test and seeing the results, he was surprised with the results. My blood sugar levels dropped without the use of drugs! I use the *E-Power* for 30 minutes everyday and continue to see my health improve – along with a head of healthy hair! *E-Power?* Maybe!
